Energy Group Update - December 2025

We won't be holding an energy efficiency advice monthly drop-in this month, but until we start again in the new year, feel free to email cfboaenergy@gmail.com.

Energy Group has had a very busy November so we would like to say a big thank you to everyone who has engaged with our events and activities this month, and throughout 2025.

On 12th November, we saw an impressive turnout in Holt Village Hall for the Renewable Energy Workshop with Bath & West Community Energy and Centre for Sustainable Energy. We had an initial discussion about solar and wind community energy, and their potential benefits for local communities in Winsley, Holt, South Wraxall and Bradford on Avon. This was the first in a series of events so contact cfboaenergy@gmail.com to sign up to hear about the next stages and events planned.

Green Open Homes ran over the weekend of 15th and 16th November. We're grateful to the hosts of the eight properties who opened their doors to inspire visitors to make their own homes more comfortable, save energy, and decarbonise their heating. It would be great to hear from the hosts and visitors so their feedback can make GOH even bigger and better next year!

Greengauge Building Energy Consultants hosted an excellent Thermal Imaging Workshop on 19th November. Huge thanks to Toby Cambray for presenting the building physics essentials followed by a chance to use a camera to help attendees feel ready to survey their homes.
Contact cfboaenergy@gmail.com to borrow a thermal imaging camera and we'd be happy to go through the results if you email your images, or come and show us the results of your survey at our one of our energy efficiency advice monthly drop-ins.

Thanks

Amy
